**Name:** Jane Doe

**Course Information:** ARC 4326 Architectural Design 7

**Term:** Spring 2012

<b><i>Course Objectives</i></b>	<b><i>Instructor's Qualifications</i></b>
Investigations of complex spatial & programmatic issues involved in design projects.	Jane Doe is internationally accepted as one of the foremost experts on the architectural modernism of Cuba. Her professional and built work in Cuba, as well as her writing and her scholarship are internationally recognized and she has received numerous awards for both. In particular, she has had extensive professional experience dealing with complex spatial and programmatic issues in the architectural design process.
Investigations of complex contextual issues involved in design projects.	Doe is one of the foremost experts on the social and historical contexts that engender European and new world architectural and urban form. Her recent publication in <i>The Architectural Review</i> discusses Cuban architecture and its complex responses to both the contexts of the vernacular and to European modernism.
Investigations of complex constructional and ethical issues involved in design projects.	Doe has worked for 56 years in the profession and understands various issues involved in design projects. Coursework taken for her B.Arch degree at the University of Havana includes ARC 4270, Professional Practice, which focuses on legal and ethical issues in the design profession.
